Mutual fund investing involves risk, including loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, differences in generally accepted accounting principles, or from social, economic, or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. In addition to the normal risks associated with investing, investments in smaller companies typically exhibit higher volatility.

**Carefully consider the Fund's investment objectives, risk factors and charges and expenses before investing.
